

## • IR Database

---

Pristine Advisers has a unique database of qualified institutional investors, retail investors, brokers, analysts and media. This database was developed 25 years ago and is updated on a daily basis.

Every contact goes through a screening process to ensure that they are high quality contacts and categorized correctly. We do not “buy” generic lists for our clients. A lot of research and screening goes into developing our lists to ensure the highest level of quality.

On top of our investment community databases, we *also* have extensive databases of Hedge Funds, Angel Investors, Venture Capitals, Family Offices, Endowments, etc.

These, again, are not *purchased*, databases, but instead, are lists accumulated through our work, business, events and networking.
